

SHRINIDHI TOTAGI

Software Developer

Dear Hiring Manager,

I am writing to express my interest in Software Developer opportunities within your organization. I am a Computer Science Engineering graduate with a strong interest in software development and building practical, technology-driven solutions to real-world problems.

Through my academic work and personal projects, I have gained hands-on experience with technologies including Python, JavaScript, React, Node.js, FastAPI, Flask, and databases. These projects have strengthened my understanding of full-stack development, backend systems, APIs, and problem-solving, while helping me develop the ability to write structured, efficient, and maintainable code.

I am particularly interested in opportunities where I can apply my technical skills, contribute to meaningful projects, and continue learning from experienced professionals. I am a motivated and adaptable individual who enjoys exploring new technologies and improving through hands-on experience.

As an early-career software developer, I bring curiosity, commitment, and a strong willingness to learn. I am eager to contribute to a collaborative team environment while continuously developing my technical and professional skills.

I would welcome the opportunity to discuss how my skills, project experience, and enthusiasm for software development could contribute to your organization. Thank you for taking the time to consider my profile. I look forward to the opportunity to connect.

Sincerely,

Shrinidhi Mahalingappa Totagi

Software Developer
